

Saskatchewan Science Centre Transforms the Indoors to the Outdoors with New Visiting Exhibition!

(May 18, 2016) – Regina, SK – *Backyard Adventures*, the newest visiting exhibit at the Saskatchewan Science Centre, unearths the science in your own backyard!

Opening on Saturday, May 21st 2016, *Backyard Adventures* will give visitors a new perspective on the science that surrounds us every day, and turn the ordinary into the extraordinary. Ride a giant bee to collect pollen, see if you can survive the harsh life of the pond, walk through the seasons, grow a giant vegetable, play a round of backyard mini golf, see the world through a dog's eyes, and even get a glimpse of all the animals that come out after you've gone to bed.

Backyard Adventures emphasizes the importance of staying healthy and active by showing visitors how much fun awaits them outdoors. "This new visiting exhibition encourages people to get outside and explore," explains Sandy Baumgartner, CEO of the Saskatchewan Science Centre. "It doesn't matter whether your backyard is right outside your home, Wascana Centre, or any of the incredible natural places that we have in Saskatchewan – *Backyard Adventures* prompts us to look at everything around us in a different way."

Backyard Adventures is open from May 21st to September 25th.

About The Saskatchewan Science Centre

The Saskatchewan Science Centre is a non-profit, non-governmental educational facility with the mission of igniting scientific curiosity and innovation in Saskatchewan communities through interactive, dynamic and engaging opportunities. Our vision of the future, in fulfilling that mission, is inspired minds through science and innovation. The Science Centre is one of Saskatchewan's largest family tourist attractions with more than 5 million visitors since its opening in 1989.
