***Wild Weather* STORMS into the Saskatchewan Science Centre on April 5th**

**(April 04, 2023)** – Regina, SK – *Wild Weather*, an immersive, experiential visiting exhibition opens this week at the Saskatchewan Science Centre. The highly interactive exhibition, developed and produced by Science North in partnership with the Ontario Science Centre, illustrates severe weather as a powerful and unpredictable force that can often cause great damage to communities, infrastructure, and lives.

“*Wild Weather* will immerse visitors of all ages in the science of severe weather. It will allow them to delve into current severe weather science, discover cutting edge technology and investigate the stories of scientists, forecasters and passionate enthusiasts,” says Sandy Baumgartner, the CEO of the Saskatchewan Science Centre. “Visitors will leave the exhibition feeling they have been saturated in severe weather elements”

From thunderstorms to summer heat waves, hurricanes to blizzards, visitors will uncover the science behind the weather all around us and learn how exciting new discoveries are unraveling many of weather’s mysteries.

The exhibition features eight zones which lead visitors through a series of *Wild Weather* experiences to gain a better understanding of the science behind severe weather, its connection to climate change and emerging technologies and forecasting techniques. They will also hear the stories of people who are working to better understand and mitigate severe weather impacts.

*Wild Weather* is included with General Admission and will be open to the public until August 21, 2023.

**About The Saskatchewan Science Centre**

The Saskatchewan Science Centre is a non-profit, non-governmental educational facility with the mission of igniting scientific curiosity and innovation in Saskatchewan communities through interactive, dynamic and engaging opportunities. Our vision of the future, in fulfilling that mission, is inspired minds through science and innovation. The Science Centre is one of Saskatchewan’s largest family tourist attractions with close to 6 million visitors since its opening in 1989.
